## Profitable Observations and Notes

ALL measures of longitude are deduced from barley corns; three barley corns make an inch, twelve inches, one foot, three foot one yard, five yards and an half one Statute-pole, or perch, forty perches make a furlong, eight furlongs make one English mile; in a mile are three hundred and twenty perches, or poles, one thousand fifty six paces; Ells, one thousand four hundred and eight; Yards, one thousand seven hundred and sixty; Feet, five thousand two hundred and forty; inches, sixty three thousand three hundred and sixty; and Barley corns, one hundred ninety thousand and eighty.

The Circumference of the Earth and Sea joynly is 35036 miles, and the Diameter 7966 miles, and its Semidiameter 3983 miles, according to English mensuration.

### The dimensions of England and the adjacent Islands.

The length of England from South to North is 386 miles, the broadest place from the lands end to Sandwich is 279 miles, the next broadest place, which is between St. Davids and Tarmouth in the East, is 240 miles, the whole compass of England is 1532 miles.

The length of Ireland North and South is 303 miles, the greatest breadth thereof East & West is 112 miles, the whole compass of the main land is 948 miles.

The greatest length of Scotland South and North is 480 miles, and the breadth East and West is 165 miles, the whole compass is 1100 miles.

The Isle of Man is in length 28 miles, the breadth 18 miles, and in compass 91 miles.

The Isle of Anglesey is in length 21 miles, in breadth 8 miles, in compass 85 miles.

The Isle of Wight is in length 22 miles, in breadth 9 miles, in compass 57 miles.

The Isle of Gurnsey is in length 13 miles, in breadth 6 miles, the whole circumference is 36 miles.

The Isle of Jersey, in length 10 miles, in breadth 6 miles, the compass is 44 miles.

## Geographical Description of the World, containing Europe, Asia, Africa, and America.

Europe contains in it these Provinces, Germany, Swedeland, Denmark, Italy, Muscovia, Hungaria, France, Polonia, Sclovonia, Norway, Grecia. The most eminent Islands are these, Great Brittan, Ireland, Sardinia, Candia, Sicilia, Nigropont, and Corfica.

The greatest length of this part of the World is 3000. miles, the breadth, 900.

Asia, the biggest of the four, and first known part of the World, contains these principal Regions and Islands, viz. Armenia, Anatolia, Persia, Assyria, China, Syria, Arabia, Mesopotamia, India, Parthia, Medea, Palestine, Chaldea, Tartaria.

In Africa are these Provinces, viz. Egypt, Barbary, Ethiopia, Nubia, Abaffines, Alonomotopa, Lybia. The Islands, Magdagerde, S. Thomas, Insula de Cape Verde, Insula de Canaria, Insula de Madera.

America, the fourth part of the World, and of the latest discovery, consists of these two parts, Mexicana and Peruana.

The Provinces of Mexicana are Nova Hispania, Terra Florida, Nova Alboina, California, Noimbegae, Nova Francia, Eftoriland. The chief Islands of Mexicana are Greenland, Meland, and Friesland.

The Provinces of Peruana are Brasil, Perni de Caibana, Peru de Caramani, Chila, Charon, Chica, Patagoros. The chief Islands of Peruana are Hispaniola, Cuba, Jamaica, and many others.

Note, that the first and last daies of every Term, are the first & last daies of appearance.

THE  
Anatomy of Mans Body;

The subsequent Diary explain'd.

The Year, consisting vulgarly of twelve moneths, is contained in twelve pages, each moneth is divided into nine columns.

In the first of which is placed the dates of the moneths.

In the second the dates of the week, & being this years Dominical Letters.

The third contains the Feasts fixed and moveable, in a plenary way the beginning and end of the Terms, and the Suns ingress into the Signs.

The fourth shews the sign, wherein the Moon is, every day at noon.

The fifth shews the hour and minute of high water at London-bridge every day.

The sixth hath a Diary judgment of the weather.

The seventh on the blank-sides Sun-rising.

The eighth is Sun-setting every day in the year.]

The ninth is notes of Hu-bonday and Physick.

January hath xxxi. dayes.

## Observations on January.

First Qu. the 7 day, a quart. past 11 at night.  
 Full Moon the 15 d, a little bef 2 in the morn.  
 Last Quarter the 23 day, at 3. in the morn.  
 New Moon the 30 day, 3 quart. past 2 af ern.

D.	OR	OS	This is the Season for good Husbands to lop and prune in perfluous Branches from Fruit- trees ; Uncover their Roots, set all kinde of Quicksets and Fruit- trees in the New of the Moon. Be sure the Wind be not North- nor East ; and set the same fides to the South and West, which grew at the first. Set Beans, Pease, and Parsnips : The weather mild and Moon decreasing, dig Gardens ; drench weak and sick Cattle, Kine, with Verjuice, Horses with water and ground Malt, sodden with a little Bran.

This moneth set, cut, and lay Quicksets and Roses, as all other Plants. Set and plant Vines, Hops, and all fruit that grows on Bushes. Sow Pease, Beans, and Onions; furnish your Gardens with Sallads and Pot-herbs for Summer. Prune and trim all sorts of Fruit-trees from Moss, Canker, &c superfluous Branches. Remove Grafts of young Trees, in the last quarter, the Moon being in *Aries, Libra, or Scorpio*.

If necessity urge, you may let Blood, but be sparing in Phyfick, and be sure when a warm day comes, to prevent taking of cold, through carelessness; for the warm air this moneth is not lasting, but oft deceives us to our prejudice.

In this moneth slimy fish, milk, and the like, that do opilate, and stop the Liver and the Veins, and chicken the blood, are to be chewed as enemies to health.

March hath xxxi dayes.

Now regarding the Wind and Weather, graft, cut Quicksers, cover the Roots of Fruit-trees (opened in December and January) with fat Earth, sow Oats, Barley, Parsnips, Onions, Carrots, Melons, Cowcucumbers, and all kinde of Pot-herbs. Slip Hartichokes and Sage, and sow all manner of Garden Seeds.

Now advise with the honest and able Astrological Physician; it is good to purge and let blood, for in this moneth the humors and blood increase, and gross Feeding breedeth gross blood and humors, therefore use meats of good digestion, and such as afford good juice and nutriment to the Body; forbear all things salt, purge the blood by Potions, and Blood-letting; sweet meats and drinks are commendable.

28	3	41	8 19
29	3	41	8 19
30	3	40	8 20
31	3	40	8 20

This Moneth commands the provident Housewife, and the prudent Artist, to set their Stills on work. In the beginning of the moneth sow and set those tender Summer Herbs that would not endure the former cold. Weed your Hop-Gardens, cut off superfluous Branches, Mow Trees and Gardens, and weed Corn; rise early, and walk the fields and gardens.

Now every Garden and Hedd affords thee Food and Physick. Rise early, walk the Fields by running streams, the North and West sides. Sage and Sweet-butter, an excellent breakfast. Clarified Whay with Sage, Scurvy-Grass Ale and Wormwood Beer, are wholesome Drinck. Green Whay excellent against Choleric and drink before it the morning, abstain from meats that are hot in nature, and salt in quality.

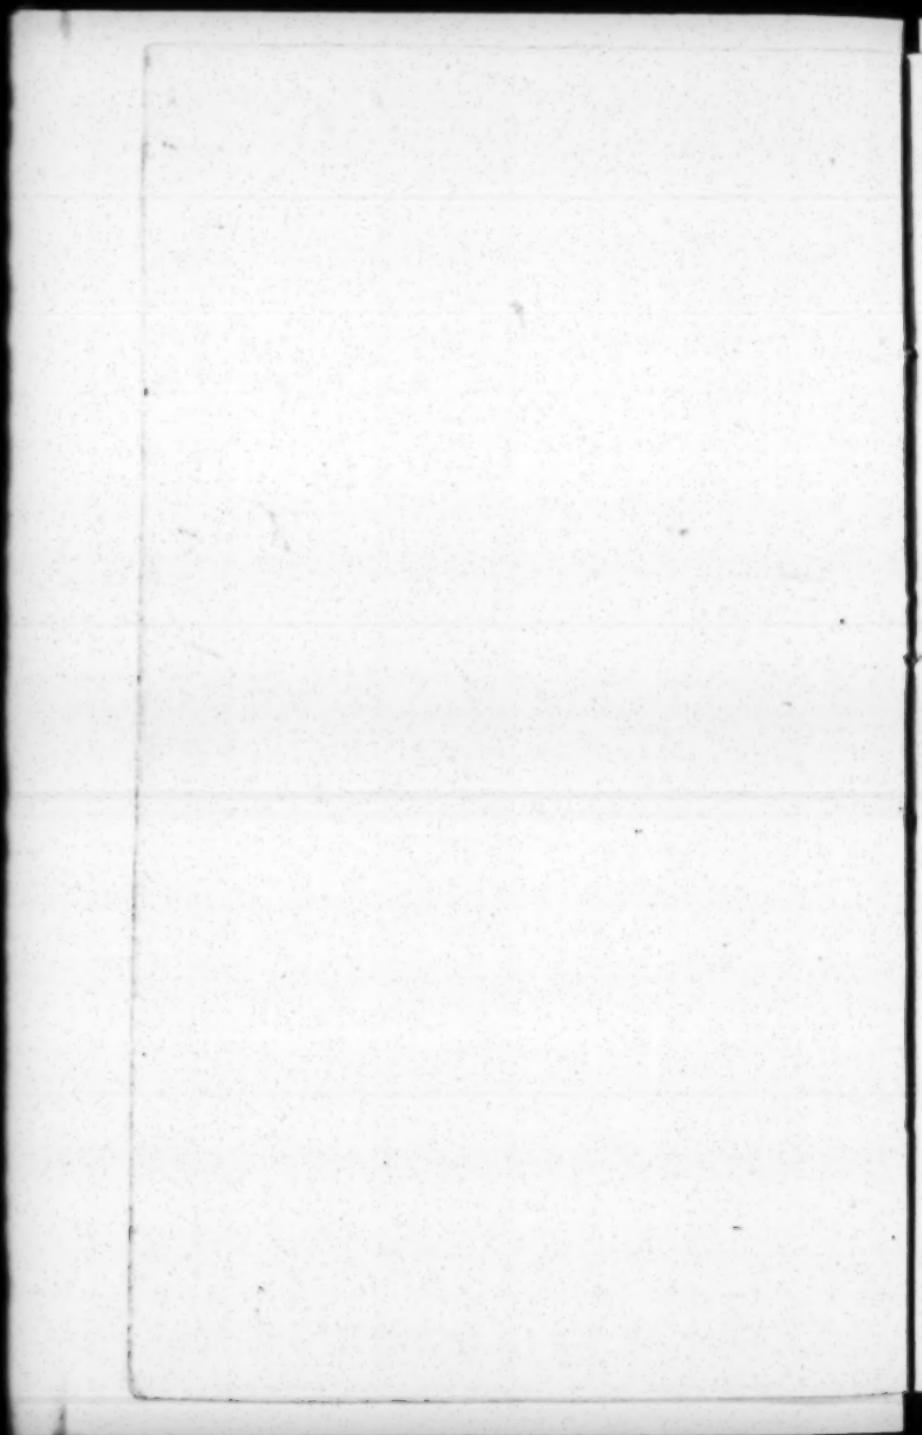

June hath xxx days.

30	3	48	3	12	

At the Full of the Moon, this  
 Moneth and next, gather your  
 Herbs to keep dry for the whole  
 year. Set Rosemary and Gilli-  
 flowers, sow Lettice and Radish  
 three or four days after the Full  
 and they will not run to Seed.  
 Shear your Sheep the Moon in-  
 creasing. Take heed of cutting  
 herbs or flowers with knife, but  
 rather gather them with your  
 fingers.

Let honest moderate Labour  
 and Exercise procure your  
 Sweat. Thin and light Diet, and  
 chaste Thoughts, tend to health  
 Lie not unadvisedly on the  
 Ground, or overhastily drink  
 Distilling of Roses, and making of  
 Surrups and Conservees are now  
 in prime: use a light and thin di-  
 et, for the stomach is weaker now  
 then in the former moneths:  
 clarified Whay boiled with cold  
 herbs very wholesome.

July hath xxxi dayes.

## Observations on July.

First Quar. the 3 day, 7 min. past 11 at night.  
Full Moon the 11 day, at 10 at night.  
Last Quar. the 18 day, a quart. past 10 at night.  
New Moon the 25 day, a quart past 8 at night.

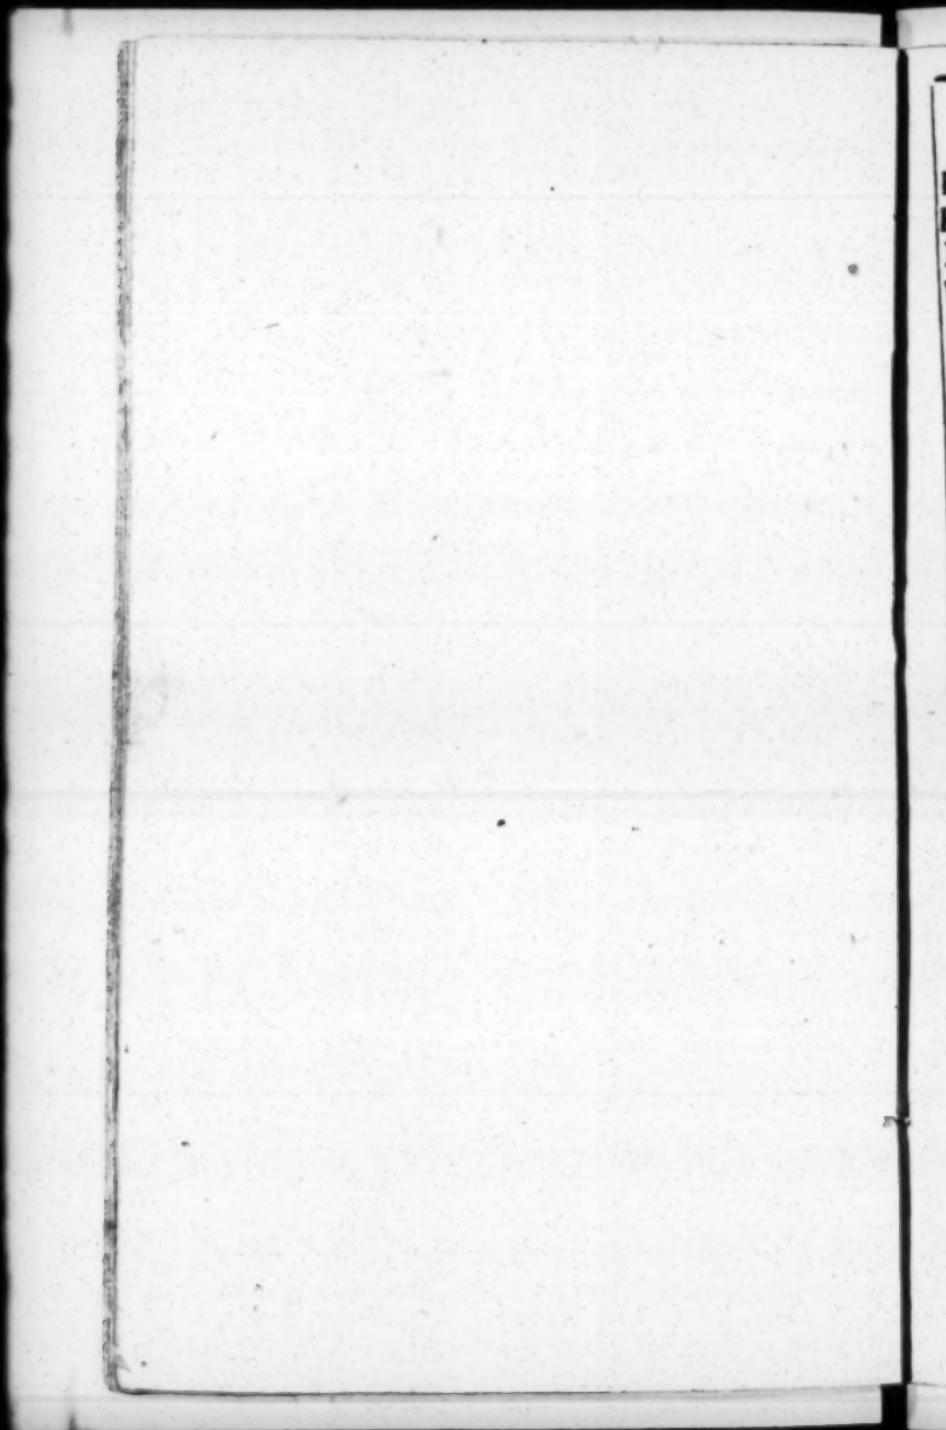

D	DR	OS	Get Rue, Wormwood, and Gall, to strew on your Flores to destroy Fleas. At the Full Moon gather Flowers and Seeds, dry your Flowers rather in the shade, than in the Sun, which too much exhaleth their vertue, but to avoid corruption, let the Suns heat a little visit them.

			Beware of Phyfick and Blood letting in the Dog-days, if the Air be hot; otherwise, if occasi on require, you may safely mak e use thereof. Now moderate Dye is best, beware of surfeits, heats and colds, for plurisies are ingen dred thereby. Use not to sleep much, especially in the after noon, for that brings Opilations, Headach, Agues, and Cathars and all noxious distempers o the same kind. Red Wine and Claret are excellent Remedies for Children against the Worms.

September hath xxx dayes.

The beginning of this Month; and the end of the former, gather Hops, their complexion being brown, and the weather fair, and no dew on the ground. Kill Bees, make Verjuice, remove and set all slips of Flowers, between the two Lady days; remove Trees from September till February, especially in the new of the Moon: The weather warm, and the Wind South or West, cut Quicksets, gather ripe Fruit. Sow Wheat and Rie, Winter Parsnips and Carrots; and set Roses, Strawberries and Barberries.

Now as the year declines, provide your Winter Garments, hang them on loosely, to prevent that you might after repent of: Good for Physick and Phlebotomy.

October hath xxxi days.

## Observations on October,

First Quarter the 1 day, 36 m. aft. 3 in the m.  
 Full Moon the 8 day, 12 min. aft. 4. in the m.  
 Last Quarter the 14 day, 50 m. aft. 7 at night.  
 New Moon the 22 day, at 5 at night.  
 First quart. the 30 day, a quart. past 7 at night.

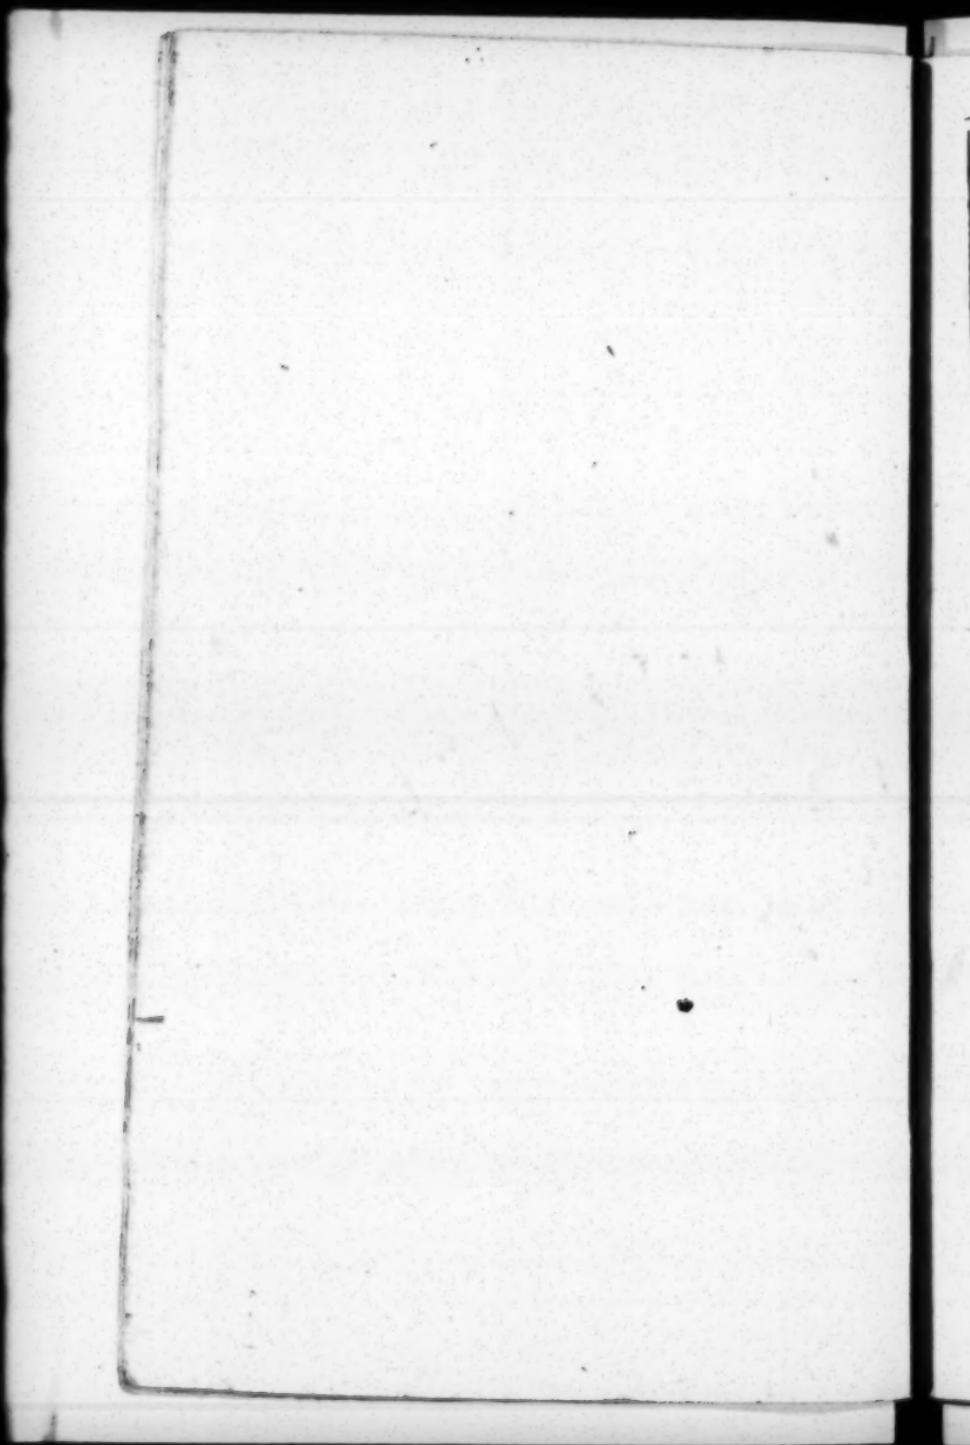

1	DR	OS	Sow Wheat and Rie, remove young Plants and Trees about the New Moon, observing this as a seasonable Secret, that in setting, you carefully place that side to the South and West, which were so before you took up the plant; otherwise the cold kills it. Gather your remaining Winter fruit, set all kindes of Nuts and Acorns, and cut Rose- trees but once in two years, if you intend to have store of Roses.

	7 41	4 19	

The Garments you last month  
hung on your backs in jest, now  
Button them close in good earnest;  
Cloath you now for prevention, for the Cold comes in-  
sensibly, and Fogs oftentimes be-  
get a whole Winters cold. Con-  
sult with your Tailors, as well  
as Physicians.

## Observations on November.

Full Moon the 6 day, 6 min. past 2 afternoon.  
 Last qua. the 13 day, at 9 in the morning.  
 New Moon the 21 day, at high noon.  
 First Quar. the 29 day, 22 m. after 8 in the mor.

D.	○	R	○	S	Set Crabtree stocks to graft on. In the old of the Moon, set Pease and Beans, and sow Parsnips and Carrots. Trench Gardens with Dung, uncover the Roots of your Apple-trees, and so let them remain till March. Kill Swine in or near the Full of the Moon, and the flesh will the better prove in boiling.

The best Phyfick this moneth,  
 is good exercise, warmth, and  
 wholesome meat and drink : but  
 if any distemper afflict the body,  
 finish your phyfick this moneth,  
 and so rest till March, unless ne-  
 cessity urge. Use good meat and  
 wholesome drinck to nourish the  
 blood. Be sure to go dry of your  
 feet; for if you go wet of your  
 feet (unless it be those always used  
 to it) be certain to be troubled  
 with Rheum & cold, and other  
 inconveniencies attending.

December hath xxxi days.

In the last quarter of the Moon  
 this moneth and the next, are  
 the best times to fell Timber :  
 Let Fowlers minde their Game.  
 Cover all your best Flowers and  
 Herbs from cold and storms,  
 with rotten Hors-dung : Look  
 well to thy Cattle, Blood Horses.  
 Let a warm fire, and a cup of  
 Nectar be thy Bath; the Kitchin  
 thy Apothecaries shop, Hot meats  
 and broths thy Physick, and a  
 well spred Table the proof of  
 thy Charity to thy poor Neigh-  
 bors, to whom this advice is  
 seasonable ;  
*If thou be poor, and canst not feast  
 at all,*  
*Thank God for such as thee to  
 feasting call.*  
 The best Physick is as before,  
 a merry honest heart, and the  
 exercise of Charity among thy  
 poor Neighbors.

of Eclipses this present Year 1671.

**T**here are onely two Eclipses of the *Moon*, almost Central, and none of the *Sun* this Year.

The first Eclipse of the *Moon* will be on the 15 of *March*, near Eleven of the Clock in the *Forenoon*; by which means, it will be visible to our *Antipodes*, to the Inhabitants of *New Guinny*, the *Straights of California*, and the *Molucca* and *Philippine Islands*. The *Moon* is Eclipsed to the quantity of 20 Digits, and will be some time in total darkness.

The other Eclipse of the *Moon* is Total, and almost Central, which will in part be visible in the *Horizon* of *London*, the 8 day of *September* in the *Afternoon*: The beginning will be at 51 minutes after 4, the beginning of Total Darkness at 50 minutes past 5; the middle of the Eclipse at 41 minutes after 6; the end of Total Darkness at 31 minutes after 7; the full end 30 minutes after 8 at night. So that the *Moon* will rise Eclipsed in the *East*, and the last half will be visible to us in *England*, from the beginning to the end of the Eclipse will be 3 hours 39 minutes. You may begin to see it at 9 minutes after 6 in the *evening*.

*The Description of the Four Quarters of the year.*

**T**he Spring begins this year *March* 10, 52 minutes after 10 in the *Forenoon*, the *Sun* then entring the first scruple of *Aries*, equalizing day and night.

The *Sun* enters the Northern Solstice *Cancer* the 11 of *June*, 38 minutes past one *Afternoon*, making to us longest day, and shortest night.

The *Sun* cuts the *Æquator* in *Libra*, *Sept.* 13. A quarter before 5 in the *Morning*, making again equal day and night.

Winter Quarter takes beginning the 11 of *December*, 36 minutes past 4 in the *Afternoon*, then entring the Southern Solstice *Capricorne*, making with us the shortest day, and longest night in the year.

A Tide Table, whereby is found the time of the full Sea, at the chiefest Ports in and adjoyning to this Kingdom.

For these places add hours and min.      h. m.

B	Arwick, S. Mat. Port. Ostend, Blackenber,	0, 49

G	Graves end, Downs, Tenet, Rumm. Ranskins.	1, 30
D	Dundes, S. Andrews, Lisbon. S. Lucas.	0, 45
T	Timo. Hartlepo. Cadiz, Gaseorgay, Arthous.	0, 0
H	Hickey, Galicia, Portugal.	0, 0

The use of this Table, with a Constan.

Do but observe in the fifth Column of the Almanack the hours and minutes of full-Sea at London bridge over against each several day of the Month, to or from which time there noted, add or subtract such hours and minutes as this Table above doth upoint, and the total of the one, or remainder of the other shall be the time of the full-Sea at any of these places aforesaid, saveing the Anticipation or protraction of time, which by the winds, Land-bloode, or Moons latitudo may be caused, which may be an hour, or sometimes more or less error, according to their force and quantity; a thing very remarkable of sea-men when they pass by any Sande, over any bar, or have a, or such like.

A true and plain Description of the High  
wayes in England and Wales.

From **London** to **Cambridge** 44 miles,  
thus accounted:

From London to Waltham 12 miles, thence to Ware 8 miles, thence to Pockridge 5 miles, thence to Barkway 7 miles, thence to Fulmire 6 miles, then to Cambridge 6 miles.

From **London** to **Worcester** 47 miles, thus:

From London to Middridge 15 miles, thence to Redcrosse 7 miles, thence to Wickham 5 miles, thence to Stokenchurch 5 mil, thence to Tetworth 5 mil, thence to Wheately-bridge 5 mil, then to Oxf. 5 mil.

From **Worcester** to **Gloucester** 44 mil, thus:

From Coventry to Southam 14 mil, thence to Banbury 10 mil, thence to Woodstock 14 mil, thence to Oxford 6 miles.

From **Oxford** to **Cambridge** 52 mil, thus:

From Oxford to Bicester 10 mil, thence to Bury Lingham 9 mil, thence to Newport 8 mil, thence to Bedford 7 mil, thence to Gamlingay 9 mil, thence to Cambridge 9 miles.

From **Coventry** to **Cambridge** 48 mil, thus:

From Coventry to Dunachurch 8 mil, thence to Northampton 10 mil, thence to Higham-ferries 10 mil, thence to St. Neodes 8 mil, then to Cambridge 12 mil.

From **Bristol** to **Gloucester** 48 miles, thus:

From Bristol to Sodbury 10 mil, thence to Cirencester 12 mil, thence to Farington 14 mil, then to Oxford 13 miles.

From **York** to **Barwick** 108 miles, thus:

From York to Tecliffe 17 miles, thence to Northallerton 7 miles, thence to Darlington 10 mil, thence to Durham 14 mil, thence to Newcastle 13 mil, thence to Morpeth 12 mil, thence to Anwick 14 mil, thence to Belford 12 miles, thence to Barwick 12 miles.

From **London** to **Plym** 151 mil, thus:

From London to Waltham 12 mil, thence to Ware 8 mil, thence to Royston 14 mil, thence to Huntingdon 15 mil, thence to Elyton 9 mil, thence to Stamford 12 mil, thence to Grantham 16 mil, thence to New-

Highways:

Newark 10 mil. thence to Tuxford 10 mil. thence to Doncaster 18 mil. thence to Wentbridge 7 mil. then to Tadcaster 13 miles, thence to York 8 miles.

From ~~Cambridge~~ to York 114 miles thus:

From Cambridge to Huntington 13 miles, to York 102 miles.

From ~~Oxford~~ to York 118 miles, thus:

From Oxford to Banbury 17 mil. thence to Weedon 10 mil. thence to Welford 14 mil. thence to Leicester 12 mil. thence to Mansfield 5 mil. thence to Nottingham 11 miles, thence to Mansfield 12 miles, thence to Doncaster 20 mil. thence to York 27 miles.

From Shrewsbury to York 103 miles, thus:

From Shrewsbury to Price 12 mil. thence to Whitchurch 4 mil. thence to Beeston-wood 12 mil. thence to Northwich 9 mil. thence to Manchester 6 miles thence to Rochdale 8 mil. thence to Blackstone edge 6 miles, thence to Halifax 6 mil. thence to Bradford 6 miles, thence to Otrley 6 miles, thence to Wetherby 13 mil. thence to York 7 miles.

How unhappy a lover am I  
whilst I ~~lath~~ for my philis in vain  
as my rose of delight is another man's wife  
who is unhappy whilst I am in pain  
since her honour affords no relief  
~~but~~ to little if paine yet you care  
tis the best of your fate in a hopeless case  
to give over betimes to despaire

I have to yed of facts med fine in vain  
for I with w<sup>t</sup> I hop not to win  
it at least tis a pleasure to know  
if you are not unhappy alone  
for of which you adore is as reched or more  
she counts all your sufferings her own

Bye nowe, let me suffer or both  
goe out of my philis eye  
I rejoyce in my breath & take pleasure  
in death to be fittid by her when I dy
